ISNCC 2008

Tutorials

The most attractive conference events will be tutorials on power theory, presented by world famous lectures in this field.

International School on Nonsinusoidal Currents and Compensation

International School on Nonsinusoidal Currents and Compensation (ISNCC) is a continuation, in a reorganized form, of the former Seminar on Nonsinusoidal Currents. The focus of attention at the conference will be on compensation under nonsinusoidal conditions, with half of the conference time devoted to tutorials on power properties of systems with nonsinusoidal voltages and currents (NSV&C), their metrological identification and compensation. The entation of new ideas and research results, as

(Łagów)

well as an opportunity for the transfer of existing knowledge on nonsinusoidal systems, their identification and compensation to

the younger generation of engineers and researchers. The conference will provide an opportunity for discussion and exchange of experience between theoreticians, practitioners, experienced and beginning scientists interested in systems with NSV&C as well as in identification and compensation in such systems.

One of the intentions of the conference organizers is to promote industry participation in the research conference will provide a forum for the pres- *The castle built by the Joanici order in XIV century* process. Therefore, we would like to invite primarily those companies which conduct or would like to

conduct applied research in cooperation with universities as well as the leading manufactures of power electronics and measurement systems, especially those whose products deal with nonsinusoidal voltage and current. Companies specializing in other fields of power electronics and measurement applications, suppliers, distributors and consumers of electrical energy are also welcome.

The Holiday House "Leśnik

Sponsorship

We would like to encourage you to become familiar with the opportunities which conference sponsorship will give you to flag your company. We invite you also to participate in the exhibition, which is an excellent meeting place for the promotion of your company and its products at an international forum of power electronics and metrology.

As a sponsor you will enjoy for instance the following privileaes:

- a banner with your logo on ISNCC 2008 Internet site;
- an advertisement of your company in the conference final program (1 page, format A5);
- your logo on the CD-ROM containing the conference papers;
- an opportunity to include promotion leaflets or other approved items in the conference bag.

You can choose which of the privileges fits your needs and pay only for them. Other forms of sponsorship based on individual agreements are also possible.

If you have decided to be a sponsor and you would like to dele-

gate your company representatives to take part in the conference you should register on the conference web page choosing the "Participant" option.

Companies not sponsoring the conference can still delegate their representatives by registering as mentioned above.

Exhibition

The exhibition provides a good opportunity to present your company's products and offers. The exhibition will take place throughout the three days of the conference. There is also the option to present your products during only one or two days of the conference.

Trześniowskie Lake

To reserve accommodation for your company representatives in the Holiday House "Leśnik" please register on the conference web page choosing the "Participant" option.

Costs

The cost of sponsorship depends on how many privileges you opt for. The cost of exhibition stands depends on the space occupied. To get a personalised quotation on the costs of sponsorship or exhibition space please contact the below mentioned person.

Contact information

You can find more information on the conference web page. If you have any questions please do not hesitate to contact us.
